Like with fingerprints, no two people have the same brain anatomy, a study has shown. This uniqueness is the result of a combination of genetic factors and individual life experiences. MRI 'glove' provides new look at hand anatomy Wearable MRI detector captures motion for first time; creates potential for injury diagnosis Date: The world of independent media, all in one place. Reading Robert Whitaker's Anatomy of an Epidemic, 1 as well as Irving Kirsch's proof that antidepressants are placebos, 2 emboldened me to finally come out with the anti biological psychiatry sentiments I had harbored for years. I agreed with each word in Whitaker's book, until he proposed that patients mostly worsen due to chemical effects of their meds.
