

# Download Answer Key For Icd10 A Comprehensive Guide

Question: When would it be appropriate to use Z01.01 (routine eye exam with abnormal findings) instead of Z01.00 (routine eye exam without abnormal findings)? Would that include refractive disorders such as myopia?  
Answer: The answer depends upon the patient's vision-plan coverage. While some payers may recognize routine eye exam with abnormal findings as a covered diagnosis, other plans may ...  
Question: Are there specific codes for bacterial and allergic conjunctivitis? Answer: For bacterial conjunctivitis, the appropriate code is H10.021 Other mucopurulent conjunctivitis, right eye, H10.022 left eye, or H10.023 bilateral. For allergic conjunctivitis the appropriate code is H10.11 Acute atopic conjunctivitis, which includes laterality. Given the added specificity inherent in ICD-10, it's no surprise that medical necessity denials for physician practices and medical groups are expected to increase throughout 2016. In addition to greater levels of code granularity, three key industry drivers are expected to impact ICD-10 coding ...  
10 Ways to Reduce Patient Statement Volume (and Reduce Costs)  
No two patients are the same. Each has a very personal healthcare experience, and each has distinct financial needs and preferences that have an impact on how, when and if they chose to pay their healthcare bill.
