

Download Bug Identification Guide For Kids

Bug Facts covers useful information about the most commonly found insects in North America, which include butterflies, beetles, ants, wasps, bees, mantids, and many others. Plus a few creatures that are commonly mistaken for insects, but actually non-insects. Topics range from to fun facts for each bug, to general insect development. Insect and Spider Identification - Information and Pictures of North American Insects, Spiders, and Bugs. There are over 1 million identified species of insects and spiders in the world with many more still awaiting discovery. We collect photographs of bugs from the United States and Canada for identification and research. We summarize our findings in guide pages for each order, family, genus, and species. Making New Discoveries More than just a clearinghouse for information, this site helps expand on the natural histories of our subjects. BUGFINDER is our in-house search form that allows you to quickly peruse the Insect Identification database by selecting PRIMARY and SECONDARY colors of your bug, its number of legs and the STATE / PROVINCE you saw the bug in. You can leave CATEGORY set to DONT KNOW unless you are sure of the group that your insect belongs to.
