A comprehensive 2006 volume on theories and applications of evidence-based anaesthesia and critical care. The first half introduces evidence-based medicine, applying the principles to anaesthesia and critical care. The second half puts it into practice throughout anaesthesia. In a world of information overload, mounting consumer pressure, and increased attention to clinical governance, it is timely for anaesthetists to ask what is 'evidence-based' anaesthesia and intensive care and how can we as individual practitioners fit it into our daily practice.
