Head Shot: The Science Behind the JFK Assassination [G. Paul Chambers] on Amazon.com. \*FREE\* shipping on qualifying offers. After more than four decades and scores of books, documentaries, and films on the subject, what more can be said about the assassination of President John F. Kennedy? A great deal""Head Shot is one of the most important books ever written on the JFK assassination. It is a must-read."-JFK Assassination Web Page "[Chambers] writes very clear prose that takes on a dizzy, endearing lyricism only when he dwells on the wonders achieved by science. Anyone who didn't sleep through high school physics and payed attention to the Zapruder (sp) film of Kennedy's assassination knows Oswald was no lone shooter, "Head Shot", by rigorously analyzing Kennedy's movements in response to bullets striking his body documents the falseness of the lone assassin narrative proposed by the Warren Commission. Chambers is a uniquely qualified guide to the assassination of President John F. Kennedy. Instead of theorizing or demonizing, he offers a fascinating defense of the scientific method through history. and applies that method to the oft-distorted JFK forensic evidence. He dismantles the bad science at the core of Vincent Bugliosi's flabby
