The Hummer H3 is an off-road vehicle that was produced from 2005 to 2010 by General Motors. The smallest model of the Hummer lineup, it was offered as a 5-door SUV or a 4-door pickup truck known as the H3T. Unlike the larger H1 and H2 models, the H3 was not developed by AM General. It was introduced for the 2006 model year, based on a modified GMT355 that underpinned the Chevrolet Colorado/GMC ... For 2009, the 5-passenger Hummer H3 gets standard hill-start assist, which prevents the car from rolling on a hill when a gradient is detected and then holds the car stationary for two seconds, after the brake is released, to give the driver time to apply the throttle. Also available is a driver-selectable full-locking front differential as part of the Off-Road Adventure package. Save \$3,418 on a used Hummer H3 near you.
