About Signatures of Life. An intriguing overview of the ways in which science could find evidence for extraterrestrial life. Are we alone in the universe, or is life a universal phenomenon? For fifty years, astronomers in SETI (Search for Extraterrestrial Intelligence) have scanned the universe for intelligent signals, but with no success. Get this from a library! Signatures of life : science searches the universe. [Edward Ashpole] -- Life is the greatest of all mysteries. Did it begin from a chance event, one never to be repeated in time and space, or is life on Earth just one example of a universal phenomenon that evolves ... An intriguing overview of the ways in which science could find evidence for extraterrestrial life. Are we alone in the universe, or is life a universal phenomenon? For fifty years, astronomers in SETI (Search for Extraterrestrial Intelligence) have scanned the universe for intelligent signals, but with no success. In this intriguing book, Edward Ashpole explains the probable reasons for this and discusses other avenues of investigation more in line with the nature of science and technology. The author examines the problems inherent in scanning the universe for radio or optical signals from an alien intelligence. Looking at the book cover of Edward Ashpole's book 'Signatures Of Life', where it shows a barren planetary surface, you'll probably say there's no life there. The sub-title 'Science Searches The Universe' sends a different message in that we are looking, as witnessed by the SETI programme, that we are looking to see if we aren't ...
