

# Download Study Guide Your Lymphatic System

## Answers

In this lesson, you will learn what an organ system is, and you will review each organ system in the human body. This will aid in your study of human anatomy and physiology. The hormones of your endocrine system help to regulate your energy levels, growth, emotions and ability to reproduce. Hormone-producing glands make up your endocrine system. Hormones are chemicals ... The lymphatic system actually consists of two semi-independent parts: (1) a meandering network of lymphatic vessels and (2) various lymphoid tissues and organs scattered throughout the body. The function of the lymphatic vessels is to form an elaborate drainage system that picks up excess tissue ... The kidneys, which maintain the purity and constancy of our internal fluids, are perfect examples of homeostatic organs. The urinary bladder is a smooth, collapsible, muscular sac that stores urine temporarily. In 24 hours, the marvelously complex kidneys filter some 150 to 180 liters of blood ...
