Hattersley makes the World's most comprehensive range of wicks for modern and antique kerosene heaters and lamps. The company's dedication to progress is exemplified by its wicks development laboratory/testing room and wick library, which Mr Woodyatt established within the factory in 1992, and has been used since then to develop their products to the highest possible level. Most convection heaters have a fuel tank of about 2 gallons in capacity and will burn for 9 to 12 hours on one filling. The prices range from \$125 to about \$220, generally, and wicks cost from \$10 to \$40 each, depending upon where you purchase them and the design of the wick.
